

## Translator Example

This file is compiled from docs/example/main.typ file, check it also.

### Retrieve translation

Portuguese: amor.

Spanish: amor.

French: amour.

Italian: amore.

### Phrase

Eu te amo, meu bem!

### Text block

El amor es un fuego que arde sin ser visto,  
es una herida que duele pero no se siente;  
es una satisfacción descontenta,  
es un dolor que enloquece sin doler.

### Translating occurrences within text

The Spanish word «caliente» is quite interesting; it has the same meaning as in English: to be warm — boiling, even —, but caliente has a kind of spicyness to it that cannot be well explained. Hispanic peoples are often called caliente because of their pasión — in fact, a synonym for to possess pasión is «ardiente» (burning, fiery). Interestingly, in Portuguese there is no word similar to caliente; the word «caloroso» is the literal translation (to be warm) but has a different meaning of amiability or excitement.

In this text the words caliente, ardiente, and pasión were automatically translated.

### Use identifier expression

Ti amo così tanto!

### Localize translations

#### Using Fluent

Eu te amei muito, meu bem!

Eu te amo muito, meu amor!

Eu te amarei muito, minha vida!

#### Using standard database

Tenho tanta saudade de você, meu amor...

### Use regular expressions

Sei così bello!

### Values retrieved

#### Context value

paixão

#### Context-dependent string

-p-a-i-x-ã-o-

#### Plain string

pai-xão
